

# MODEL E MULTI FERRO

**HAPERT**  
TRAILERS

The E MULTI FERRO assortment has been expanded. A model with dimensions of:

**3750 x 1800 mm is now available!!**

Similarly to all "FERROS", this model is fitted with a floor made from a single piece of 3-mm thick, full-immersion galvanised steel plate (that also has holes mounting integrated fastening brackets)

This new tipper is delivered from the factory with the "MULTI" package, which includes:

- a lowered loading floor and 195/50 R13 tyres
- electric operation via battery mounted in a steel protective container with a plastic cover
- 2 aluminium drive-on ramps integrated under the floor
- integrated U-profile for easily hooking in the drive-on ramps
- 2 easy-operation, "heavy duty" retractable prop stands (adjustable 90° rotation)
- a handle for the prop stands including a prop stand support bar mounted on the front
- a battery charger (with plug provided separately)
- If you would like to receive more information, your "HAPERT" dealer would be pleased to help you.

**2011**

**Ultra-reliable, built to last and...  
...with loads of new, interesting  
options (p.t.o.)!!!**

# Options and accessories MODEL E MULTI FERRO

# 2011

**NEW ▶**

- 1** Cargo securing net (fine-meshed) with cut-aways in the 4 corners to allow multifunctional use, e.g. if a front and/or rear rack is mounted

**◀ NEW**

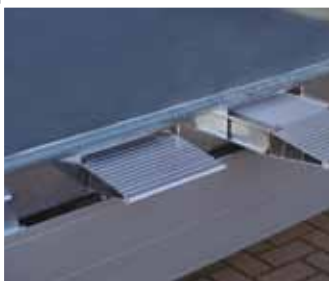

- 2** 40-cm high, aluminium dropsides that can be hung on the left, right or back of the trailer (only possible in combination with downward-moving hinged tailgate)

**NEW ▶**

- 3** The modified tailgate suspension mechanism makes it possible to pull the drive-on ramps out of the storage compartment and hook them to the U-profile on the rear of the trailer in one, simple operation - only recommended for models with (lowered) 30-cm high aluminium dropsides. An added advantage of this is that the rear lights are more safely protected when tipping back.

**◀ NEW**

- 4** Winch and support, removable, in combination with a hinged front board. The winch can be moved over the width of the trailer (this option is only possible with electrically operated tipper trailers).
