AMIGO HOLIDAY SET ASSEMBLY INSTRUCTIONS

The holiday set consists of:

- 1 plastic cover with roof rack rails
- Spring system (1 left and 1 right)
- 1 clip fastener plate
- 6 T-groove seals
- 1 tube of sealant (grey) with application nozzle

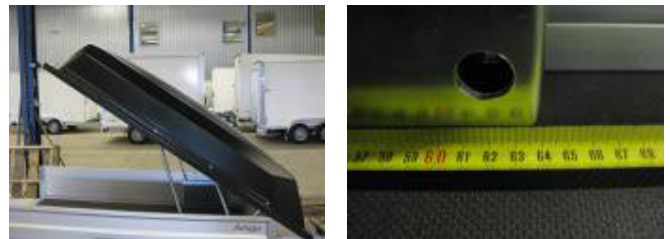

Apply sealant in the T-groove at the corner uprights on the inside of the trailer. Push the T-groove seals into the T-groove against the corner post. Apply sealant to all the corner posts on the inside of the trailer.

Place the cover on a couple of trestles. Fit the spring system into the pre-drilled holes with the short hinge pin at the front, the closed side of the assembly plate on the inside and the round head screw going from the outside to the inside.

Lift the cover and the spring system into the trailer. The distance from the rear of the attachment plate to the inside of the front board should be 640 mm. Place the hammer head bolt into the T-groove and secure it in place with the lock nut.

Place the clip fastener plate in the middle of the rear board using the hammer head bolts and rotate them into the T-groove. Tighten the shear nuts until the nut breaks.
