AMIGO SUPPORT WHEEL ASSEMBLY INSTRUCTIONS

The support wheel set consists of:

- 1 support wheel
- 1 clip fastener
- 2 bolts M10 x 30
- 2 lock washers M10

Unscrew the handle out of the clip fastener.

Place the lock washer over the bolt.
Insert the bolt with the lock washer
through the clip fastener.

Screw the bolt into the fitted blind
rivet nuts in the leg of the drawbar.
Use a 17 mm open-ended spanner to tighten
the bolt.

Place the support wheel in the clip fastener and
firmly tighten the clip fastener's handle.

You can now use the support wheel's handle
to raise the trailer to the correct height.

When you have connected the trailer to
the back of your car, make sure the
support wheel has been placed in the V-groove
correctly and it has been raised as high as
possible.

Net weight of the support wheel set: 5 kg
