MODEL D

MODEL D MULTI

▼ **THE D-MULTI MODEL:**

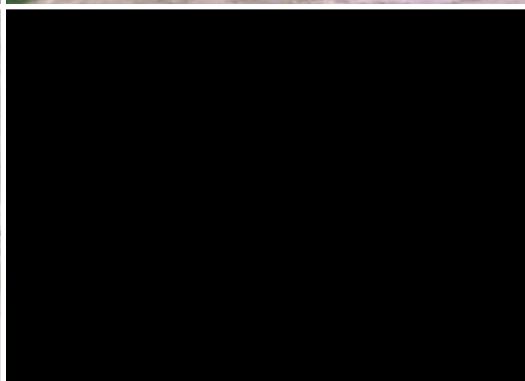

VERSATILE AND PRACTICAL!

- The most popular options, at lucrative prices, are combined in this package. Includes:
- a lowered chassis with tyres 195/50 R13 tyres
 - a pair of aluminium '2500' loading ramps
 - ramps integrated under the floor
 - adjustable heavy duty prop stands
 - electric operation via battery
 - battery charger (provided separately)

TRAILERS FROM HAPERT; 100% RELIABLE!

HAPERT has been the number one brand in the trailer sector for many years now. In the Benelux countries, Hapert is the undisputed market leader in the sector for light trailers with an overrun brake. HAPERT trailers are available in many European countries from professional dealers who have specialist knowledge of the products and personal involvement with the brand and the HAPERT organisation.

Thanks to the wide range available, you will always find a HAPERT trailer that precisely meets your personal requirements. Users know that HAPERT trailers are all well-thought-out quality products that prove themselves time and time again under the most varied of conditions.

THE TOUGH HAPERT MODELS C, D, AND D-MULTI: SOLID AND RELIABLE!

The basic versions are constructed with:

- a completely welded and hot-dip galvanised chassis
 - a built-in, solid, hydraulic cylinder operated by a hand-pump
 - high-quality rubber torsion axles
 - 300 mm high aluminium dropsides fitted with robust, integrated fasteners
 - 4 removable corner pillars
 - a tailgate hinged only at the bottom
 - welded-in-place fastening hooks
 - different numbers of fastening brackets (photo 7a and b) are integrated in the sides depending on the length of the trailer.
- This "HAPERT" load securing system is TÜV approved and DIN EN 75410-1 certified!
- a heavy duty support wheel (option for model C)
 - a galvanised steel plate on the plywood floor (option for model C)

OPTIONS AND ACCESSORIES.

Many options and accessories are also available, such as:

- electric control powered by a battery (photos 8a and b) that is completely enclosed in a protective box made of galvanised steel with a plastic cover
- a top- and bottom-hinged tailgate
- an (emergency) hand pump (photo 9)
- a lowered chassis with 195/50 R13 tyres (photo 1)
- 400 or 500 mm high raised aluminium dropsides (photo 2)
- 300 mm high removable aluminium dropsides (photo 3 and 4)
- a rack (such as a ladder rack), left and right, removable
- a weldmesh side extension on all sides, removable, height 700 mm (photo 5)
- a removable front rack
- a winch mounted to a bracket on the front side (photo 6)
- integrated loading ramps (photo 1)
- heavy duty prop stands
- light protection (photo 10)
- available in 2000 / 2200 and 2400 mm wide!
- also available as 'MULTI' version (see photo 1 and description).

▲ Fastening brackets are integrated in the sides. The "HAPERT" load securing system is TÜV approved gives you even more certainty and peace of mind when transporting a wide variety of goods and machines.

MODEL BL

model BL	inside dimensions in mm			loading floor height in mm	Maximum Gross Weight in kg	approx. empty weight in kg
	length	width	height			
BL 2000	2500	1300	450	590	2000	560
BL 2700	3000	1500	450	590	2700	680
BL 3000	3000	1800	450	600	3000	740
BL 3500	3000	1500	450	610	3500	730
BL 3500	3000	1800	450	610	3500	760

MODEL BL; THE EXTREMELY TOUGH, DOUBLE AXLE TIPPER WITH THE LOWEST TRAILER BED!

The hydraulically operated, rear-tipping base model is equipped with a fully welded and hot-dip galvanised chassis, a strong, manually operated hydraulic cylinder, rubber-sprung axles and brakes with an automatic reversing system, a tailgate that hinges both at the top and bottom, welded fastening hooks, a heavy duty jockey wheel and, moreover, a galvanised steel plate on top of the plywood floorboard. The side walls are 45 cm high (including railing) and made of double-sided anodised aluminium.

Put simply: this robust powerhouse is very well-equipped!

All specifications are subject to change, code 819-3

MANY OTHER OPTIONS AND ACCESSORIES ARE ALSO AVAILABLE

such as battery-powered electric controls, side walls made of plywood with a plastic protective coating or made of hot-dip galvanised steel, (weldmesh) extensions on the side walls (photo 11), extra-height aluminium walls (photo 12), a winch with a front-mounted support (photo 12), adjustable heavy duty prop stands, spare wheel, etc.

Moreover, when combined with integrated aluminium loading ramps (photo 10), ideal for transporting your excavator or other wheeled machinery!
